

# Data Intake Report

Name: Model Deployment on Cloud

Report date: 04/08/24

Internship Batch: LISUM35

Version:<1.0>

Data intake by: Ashraf Moumin

Data intake reviewer: Data Glacier

Data storage location: Github and Cloud (Azure)

## **Approach Steps:**

- **Finalizing the Github Repository.**
- **Creating an Azure account and a web app.**
- **Linking it to the repository thus creating a .yaml file**
- **Running the .yaml file in Github Actions CI/CD until the deployment step successfully completed.**
